

The AutoCab has been designed to provide secure access to over 200 different items using a variety of drawers, shelves and dividers. The assortment of storage module sizes make managing both small and large MRO, PPE, and many other items a reality (carbide inserts, drill bits, spray cans, tape, safety glasses, air tools, welding tips, solder and more.)

The system can also control access to products by item, employee or job. Unlike many point-of-use dispensing machines, the AutoCab manages issue and return transactions of both fast and slow moving items while eliminating the need for individual repacking of items.

## HOW IT WORKS

**Login.** Employees access the AutoCab by using their employee badge or by entering their employee number.

**Select item.** The user selects the item they want and the appropriate door will open.

**Take.** The user can take as many items as needed using the "take" and "return" item buttons inside the cabinet. Closing the door completes the transaction.

*Optional:* A PIN can also be required as well as prompts to track overhead data like department number, job, number, customer number, tail number, etc.

### FEATURES

- Available 24-7 - with security and accountability
- Secured doors and compartments - provide medium level control
- Automates purchase orders
- No need to repackage items
- Easy to reconfigure
- Clear doors provide visibility making supplies easy to find
- Full user access support - supports proximity cards, key fobs, mag-stripe cards, barcodes, keypad/PINs
- Universal search – search for any item plant-wide
- Multilingual - support for other languages
- Available as main unit (with touchscreen and embedded PC) or aux (add-on without PC)
- Compact footprint:  
height: 77 in. (1,955.8 mm)  
width: 52 in. (1,320.8 mm)  
depth: 34 in. (863.6 mm)
- 12-month warranty

### SOFTWARE

- Over 200 standard reports
- AutoCrib.net or client-server - cloud managed services or secured internal network
- EDI - advanced ship notices (ASN) via EDI
- ERP system support - interface with many popular ERP systems (SAP, JDE, Baan, etc.)
- Alerts - get inventory alerts, and send email reports to any smartphone, tablet, or computer
- Seamlessly connect - use it with existing AutoCrib systems or use it as a standalone system
